DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following intentions required less than 35 U.S.C. 121:

I. Claims 1-4 and 6-8 drawn to rotary dynamoelectric machine.

Classified in class 310, subclass 90

II. Claim 5 drawn to method of fabricating a spindle motor classified in

Class 29, subclass 596.

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by other materially different process, such as the magnets can be pre made and pre magnetized rather than injection molding and post magnetization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for group 1-4, 6-8 is not required for group 5 restriction for examination purposes as indicated is proper.

A telephone call was made to James A. Oliff office on July ,18,2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
